Electromagnetic Fields in Stratified Media (Advanced Topics in Science and Technology in China)

Kai Li

Electromagnetic Fields in Stratified Media (Advanced Topics in Science and Technology in China) Kai Li

"Electromagnetic Fields in Stratified Media" deals with an important branch of electromagnetic theory, which has many useful applications in subsurface communication, radar, and geophysical prospecting and diagnostics. The book introduces to the electromagnetic theory and wave propagation in complex media, while presenting detailed models for various media: 3, 4, N-layered media, boundary conditions, and anisotropic media. In particular, the complete solutions for a trapped surface wave and lateral wave in a three- or four-layered region, the complete solutions for low frequency wave propagation over a spherical surface coated with a dielectric layer, and the transient field of a horizontal dipole in the boundary layer of two different media are presented. The book is designed for the scientists and engineers engaged in antennas and propagation, EM theory and applications.

Dr. Kai Li is Professor at Zhejiang University.

From reader reviews:

Alfonso Miller:

In this 21st one hundred year, people become competitive in every single way. By being competitive right now, people have do something to make these individuals survives, being in the middle of the particular crowded place and notice by simply surrounding. One thing that often many people have underestimated the item for a while is reading. Yep, by reading a e-book your ability to survive raise then having chance to stand than other is high. For you personally who want to start reading any book, we give you that Electromagnetic Fields in Stratified Media (Advanced Topics in Science and Technology in China) book as starter and daily reading reserve. Why, because this book is usually more than just a book.

Edna Miller:

This book untitled Electromagnetic Fields in Stratified Media (Advanced Topics in Science and Technology in China) to be one of several books this best seller in this year, this is because when you read this e-book you can get a lot of benefit upon it. You will easily to buy this specific book in the book shop or you can order it through online. The publisher on this book sells the e-book too. It makes you quicker to read this book, because you can read this book in your Smart phone. So there is no reason for your requirements to past this reserve from your list.

Bert Martinez:

Playing with family inside a park, coming to see the coastal world or hanging out with pals is thing that usually you could have done when you have spare time, after that why you don't try factor that really opposite from that. Just one activity that make you not sensation tired but still relaxing, trilling like on roller coaster you have been ride on and with addition associated with. Even you love Electromagnetic Fields in Stratified Media (Advanced Topics in Science and Technology in China), you could enjoy both. It is very good combination right, you still desire to miss it? What kind of hangout type is it? Oh seriously its mind hangout fellas. What? Still don't have it, oh come on its named reading friends.

Alex Miller:

Many people spending their time period by playing outside with friends, fun activity using family or just watching TV all day long. You can have new activity to shell out your whole day by looking at a book. Ugh, do you think reading a book really can hard because you have to accept the book everywhere? It fine you can have the e-book, having everywhere you want in your Smart phone. Like Electromagnetic Fields in Stratified Media (Advanced Topics in Science and Technology in China) which is having the e-book version. So , try out this book? Let's find.
