Alternative Fuels for Transportation (Mechanical and Aerospace Engineering Series)

Alternative Fuels for Transportation (Mechanical and Aerospace Engineering Series)

With existing petroleum oil and natural gas reserves enough for only several more decades, there is an imminent need for alternative energy sources. This critical situation has incited greater improvements in automotive technology and the increased use of nonconventional fuels. **Alternative Fuels for Transportation** covers the potential, production methods, properties, vehicle tests, merits, and drawbacks of alternative fuels. The esteemed editor highlights the importance of moving toward alternative fuels and the problems and environmental impact of depending on petroleum products.

Each self-contained chapter focuses on a particular fuel source, including vegetable oils, biodiesel, methanol, ethanol, dimethyl ether, liquefied petroleum gas, natural gas, hydrogen, electric, fuel cells, and fuel from nonfood crops. For most of these fuels, production methods, storage, transportation and distribution, physiochemical properties, system modification, engine tests, economics, applications, safety aspects, material compatibility, and future scope are discussed.

Although we now know that increases in greenhouse gases will contribute to global climate change, the transportation sector and decentralized power generation continue to heavily rely on petroleum products, particularly gasoline and diesel. Exploring how to counteract the world's energy insecurity and environmental pollution, this book provides a comprehensive understanding of nonconventional fuel sources and technology.

From reader reviews:

Rose Cordeiro:

Information is provisions for folks to get better life, information today can get by anyone on everywhere. The information can be a knowledge or any news even a problem. What people must be consider if those information which is within the former life are hard to be find than now could be taking seriously which one would work to believe or which one the particular resource are convinced. If you receive the unstable resource then you get it as your main information you will have huge disadvantage for you. All of those possibilities will not happen in you if you take Alternative Fuels for Transportation (Mechanical and Aerospace Engineering Series) as the daily resource information.

Kevin Shepherd:

Hey guys, do you wants to finds a new book to read? May be the book with the name Alternative Fuels for Transportation (Mechanical and Aerospace Engineering Series) suitable to you? Typically the book was written by well known writer in this era. The book untitled Alternative Fuels for Transportation (Mechanical and Aerospace Engineering Series)is the main of several books that everyone read now. This particular book was inspired a number of people in the world. When you read this e-book you will enter the new dimension that you ever know just before. The author explained their strategy in the simple way, so all of people can easily to know the core of this e-book. This book will give you a wide range of information about this world now. So that you can see the represented of the world on this book.

Robert Banks:

Are you kind of hectic person, only have 10 or even 15 minute in your morning to upgrading your mind expertise or thinking skill actually analytical thinking? Then you have problem with the book as compared to can satisfy your small amount of time to read it because all this time you only find book that need more time to be learn. Alternative Fuels for Transportation (Mechanical and Aerospace Engineering Series) can be your answer since it can be read by an individual who have those short extra time problems.

Regina Schubert:

Reading a book to be new life style in this season; every people loves to examine a book. When you go through a book you can get a wide range of benefit. When you read guides, you can improve your knowledge, simply because book has a lot of information into it. The information that you will get depend on what forms of book that you have read. If you want to get information about your examine, you can read education books, but if you act like you want to entertain yourself you are able to a fiction books, such us novel, comics, as well as soon. The Alternative Fuels for Transportation (Mechanical and Aerospace Engineering Series) will give you a new experience in studying a book.
