Theory & Design of Air Cushion Craft

Liang Yun, Alan Bliault

Theory & Design of Air Cushion Craft Liang Yun, Alan Bliault

This definitive text describes the theory and design both of Air Cushion Vehicles (ACV) and Surface Effect Ships (SES). It begins by introducing hovercraft types and their development and application throughout the world in the last three decades, before going on to discuss the theoretical aspects of ACV and SES craft covering their hovering performance, dynamic trim over calm water, resistance, stability, manoeuvrability, skirt configuration and analysis of forces acting on the skirts, ACV and SES seakeeping, and the methodology of scaling aerodynamic and hydrodynamic forces acting on the ACV/SES from model test data.

The latter chapters describe a design methodology, including design criteria and standard methods for estimating craft performance, lift system design, skirt design, hull structure, propulsion systems and power unit selection. Much technical information, data, and references to further work on hovercraft and SES design is provided. The book will be a useful reference to engineers, technicians, teachers, students (both undergraduate and postgraduate), operators etc. who are involved in ACV/SES research, design, construction and operation.

Guides the reader on how to perform machinery and systems selection within ACV and SES overall design
For teachers, students (both at under- and post-graduate level), engineers and technicians involved in ACV/SES

From reader reviews:

Eva Velasco:

What do you consider book? It is just for students since they're still students or that for all people in the world, what best subject for that? Just simply you can be answered for that problem above. Every person has various personality and hobby for every other. Don't to be obligated someone or something that they don't would like do that. You must know how great and also important the book Theory & Design of Air Cushion Craft. All type of book is it possible to see on many solutions. You can look for the internet resources or other social media.

Leonard Santiago:

This Theory & Design of Air Cushion Craft book is absolutely not ordinary book, you have after that it the world is in your hands. The benefit you have by reading this book is definitely information inside this e-book incredible fresh, you will get facts which is getting deeper anyone read a lot of information you will get. This Theory & Design of Air Cushion Craft without we understand teach the one who reading it become critical in thinking and analyzing. Don't be worry Theory & Design of Air Cushion Craft can bring once you are and not make your carrier space or bookshelves' turn out to be full because you can have it within your lovely laptop even cellphone. This Theory & Design of Air Cushion Craft having very good arrangement in word in addition to layout, so you will not truly feel uninterested in reading.

Lien Fugate:

Often the book Theory & Design of Air Cushion Craft has a lot of knowledge on it. So when you read this book you can get a lot of profit. The book was written by the very famous author. This articles author makes some research before write this book. This book very easy to read you can get the point easily after perusing this book.

Paula Shepard:

Is it you actually who having spare time subsequently spend it whole day by means of watching television programs or just telling lies on the bed? Do you need something new? This Theory & Design of Air Cushion Craft can be the response, oh how comes? A book you know. You are so out of date, spending your time by reading in this new era is common not a nerd activity. So what these publications have than the others?
