Statistical Analysis of Management Data

Hubert GATIGNON

Statistical Analysis of Management Data Hubert GATIGNON

Statistical Analysis of Management Data provides a comprehensive approach to multivariate statistical analyses that are important for researchers in all fields of management, including finance, production, accounting, marketing, strategy, technology, and human resources. This book is especially designed to provide doctoral students with a theoretical knowledge of the concepts underlying the most important multivariate techniques and an overview of actual applications. It offers a clear, succinct exposition of each technique with emphasis on when each technique is appropriate and how to use it. This second edition, fully revised, updated, and expanded, reflects the most current evolution in the methods for data analysis in management and the social sciences. In particular, it places a greater emphasis on measurement models, and includes new chapters and sections on:

- confirmatory factor analysis
- canonical correlation analysis
- cluster analysis
- analysis of covariance structure
- multi-group confirmatory factor analysis and analysis of covariance structures.

Featuring numerous examples, the book may serve as an advanced text or as a resource for applied researchers in industry who want to understand the foundations of the methods and to learn how they can be applied using widely available statistical software.

From reader reviews:

Greg Wilson:

In this 21st one hundred year, people become competitive in each and every way. By being competitive today, people have to do something to make them survive, being in the middle of the actual crowded place and notice by means of surrounding. One thing that often many people have underestimated that for a while is reading. Yeah, by reading a reserve your ability to survive enhance then having chance to stand than other is high. For you who want to start reading a book, we give you this Statistical Analysis of Management Data book as basic and daily reading e-book. Why, because this book is more than just a book.

Marcella Aragon:

Nowadays reading books be a little more than want or need but also be a life style. This reading habit give you lot of advantages. Advantages you got of course the knowledge even the information inside the book in which improve your knowledge and information. The information you get based on what kind of book you read, if you want get more knowledge just go with schooling books but if you want truly feel happy read one using theme for entertaining including comic or novel. Often the Statistical Analysis of Management Data is kind of guide which is giving the reader erratic experience.

Charles Buffington:

The particular book Statistical Analysis of Management Data has a lot of information on it. So when you check out this book you can get a lot of gain. The book was authored by the very famous author. McDougal makes some research before write this book. This particular book very easy to read you can find the point easily after looking over this book.

April Baker:

As a college student exactly feel bored to help reading. If their teacher expected them to go to the library or to make summary for some reserve, they are complained. Just minor students that has reading's heart or real their hobby. They just do what the trainer want, like asked to go to the library. They go to presently there but nothing reading critically. Any students feel that reading is not important, boring as well as can't see colorful images on there. Yeah, it is to get complicated. Book is very important to suit your needs. As we know that on this era, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. So , this Statistical Analysis of Management Data can make you feel more interested to read.
